TOXEMIA

**Background:** Illuminated Economic Solutions has illuminated the darkness around the idea that one might wish to consciously embark on a long pathway which promotes a clean environment for the ones who elect for the clean environment and the existing environment if one elects to have a less positive environment as the: future arises; past sets; and present forms.

Perhaps one might enable this as a forewarning to the future humans from the past life and immediately share the illumination of the darkness with the future in the present. The children are the future and ignorant children with no light will perhaps find darkness in place of bliss.

Perhaps one might argue that Toxemia is the root cause of all diseases and Toxemia has many sources; however one is Hypertension or high blood pressure. Hypertension can result from a negative environment. However, many humans are simply not aware or lack the knowledge of the fact that there are a whole list of negative environmental sources to all or most diseases; not to be confused with a cure. There will never be a cure for a negative environment that is not being shifted to a positive environment and a positive environment is not to be confused with a total cure. One may argue that a continuous battle to survive all or most diseases will never end as additional light is being shed and absorbed via knowledge. Knowledge is most certainly power and ignorance surrounded by darkness is never visible nor a bliss. Perhaps one should warn the youth to save the future, in the present, as time passes.

Toxemia is the prime cause of cancerous cellular growth. The cancerous cells grow without the need of oxygen and oxygen deprived cells become cancerous after deprivation of oxygen levels reach that of approximately 33% or greater. High levels of oxygen perhaps will deprive the cancerous cells as the cancerous cells required a loss of oxygen greater than 33%.

Hypertension can also result from a negative environment, such as: chemicals (air, food, water); heavy metals; kidney disease; sugars (all types); radiation; and more. The reason why one may be confused as to the one root cause to Hypertension is simply due to the fact that there are more than one root cause; naturally as one illuminates the darkness of the negative environment with the power of God and knowledge shared from God to guide one further away from the negative environmental factors and closer toward the positive.

Electricity exposure as electricity equals radiation and radiation equals electricity can cause Hypertension.

One must contain the diet and the lifestyle (total environment). One must contain the sugar intake to a low-sugar diet.

Diuretics can be a real lifesaver when applied to Hypertension (high blood pressure). Natural plant-based blood purifiers and diuretics may be some of many solutions that lead further from the negative environment and closer toward the positive. (diuretics)

**Results:** Perhaps one might consciously elect to illuminate the youth with knowledge of future problems and recruit the ones who elect to save the future by supporting a positive clean environment.

Understanding how a negative environment can lead to all or most diseases via Hypertension (high blood pressure) and how Hypertension has many sources is perhaps one of the most important aspects of the illumination of knowledge.

Toxemia can cause Hypertension and Hypertension can cause Toxemia. One may argue if one is to appear, there is a significant chance the other shall illuminate as well; almost simultaneous.
